Searching for Type Ia Supernova Progenitors

Thierry Lanz

University of Maryland, USA

Abstract. The identification of progenitors of supernovae of type Ia (SN Ia) remains elusive. I will review the case for single-degenerate systems versus double-degenerate systems. A promising channel leading to a SN Ia event involves accreting white dwarfs that sustain steady nuclear burning. They are observed as close binary X-ray sources with a supersoft spectrum (CBSS). I will discuss the properties of these systems based on an on-going multi-wavelength (Spitzer, Chandra and XMM-Newton) study of CBSS.

Additional Information

The seminars are given in the ISDC "Pavillon" building
Address: INTEGRAL Science Data Centre, ch. d'Écogia 16, CH-1290 Versoix
